LinkedIn: ABD M.

Awards:

CUDA Plant Monitoring System **(2026 ConHacks winner)**
Path Finder Maze Robot **(COIL: Netherlands X Canada Top 3 Best Network Application Layer)**

Education:

Area of Emphasis

Bachelor of Computing Degree, Computer Science (Cybersecurity) - University of Guelph — *Sep 2025 – Present*
Advanced Technology Diploma, Computer Engineering - Conestoga College — *Sep 2020 – Apr 2023*
Ontario High School Diploma "OSSD" – Cameron Heights Collegiate Institute — *Sep 2018 – Jun 2020*

Corporate Experience:

Conestoga College Cyber Security Association {CCSA} – *President* — *Sep 2024 – May 2026*

- Founded the college's 1st cybersecurity club (**Fully accredited by Conestoga College**).
- Led a team of 4 executive students and **80+ student members** to host collaborations with internal and external organizations, including **Google Developers Group (GDG), Guelph University Cybersecurity Club**, to facilitate knowledge.
- Delivered **hands-on** cybersecurity workshops and labs (CTFs, Cryptography, phishing, Kali Linux tools) introducing students to red and blue-team workflows with **150+ attendees**.

ClariNexus – *Developer* — *Sep 2025 – Dec 2025*

- Built an interactive interface with **Django** and **FastAPI-based** data applications leveraging **Streamlit** to visualize insights derived from **30,000+ time-series** data points per session.
- **Implemented data validation**, structured logging, and error tracking to investigate abnormal pipeline behavior, reducing data anomalies **by over 70%**.
- **Developed REST API** ingestion pipelines with **Pandas** and **NumPy** and conducted load testing using **JMeter** to assess resilience and **improve** performance **by 60%**.

LinePal – *Tester* — *May 2025 – Aug 2025*

- **Conducted** authorized load and volume testing on the system executing **20+ test scenarios**.
- **Built** automated **Node.js** data pipelines to ingest **1,000+ API requests and responses payloads, and attachments** into a structured security assessment.
- Performed authenticated and unauthenticated **security testing** across frontend, API, and backend infrastructure, identifying, documenting and resolving **14** confirmed **vulnerabilities (CWE-class)**.

Certifications & Technical Skills:

1. CompTIA Security+
2. TryHackMe – Introduction to Cyber Security (2025)
3. Web-Dev CEC (Canada Gov)
4. Google Cybersecurity Professional Certificate
5. Conestoga College Credible Foundations (Leadership)

Programming & Development: Object-Oriented Programming (OOP), C, C#, C++, Python, Java, JavaScript, PHP, SQL, Assembly, Rust, Bash, PowerShell, HTML/CSS, Test-Driven Development (TDD), Unit Test Development, RDBMS, VPNs and Firewalls.

Cybersecurity Tools: Wireshark, OSINT Techniques, CIA Triad, NIST Cybersecurity Framework (CSF), Cisco Packet Tracer, Arduino, ESP32, Raspberry Pi.

Professional Summary:

I spent the past five years learning by building. Through multiple internships and 35 documented software projects, I've gained hands-on experience in software engineering, cybersecurity, cloud systems, and IoT, **all documented on GitHub**. Along the way, I built a custom CTF platform, developed a vulnerability scanner, automated SIEM workflows, created ML-powered dashboards. Every project has been refined through a wide range of testing, code reviews, and mentorship from my professors.
